

Sanofi has a proud history of working with the health care community.

Over many years we have formed partnerships with many patient organisations to better understand the needs and aspirations of Australians who want to live better and have healthier lives.

Our relationships are built on mutual trust and respect as we uphold the independence of these organisations.

We regularly publish information about the patient organisations we contribute funds to. For the most recent list, please find below:

January to December 2013

Australian Pompe Association	Support for day to day running costs to enable the association to meet its stated objectives, third party support for disease awareness activities and support for patient education
